# DATCOM – industry specific telematic solutions from a single source

## Quality from one single source

*With a telematic solution from DATCOM you can optimally control nearly any kind of company in the fleet transport sector, whilst benefiting from professional solutions from one single source and over 30 years' experience in the area of data communication.*

*This means not only the best quality in each and every component and the overall solution, but also a large future efficiency, clear total cost, and a fast return on investment. In detail, the telematic solutions from DATCOM offer you the following advantages:*

- An ideal overview thanks to telematic
- Flexible solutions from DATCOM
- High performance systems that can be individually adapted
- A solution that will grow in line with your requirements
- Use of the latest communication channels
- A maximum of service from a single source
- Transport security is a matter of technology

### DATCOM S-Box

*On board computer for the position definition and vehicle tracking offering the possibility of integrating additional hardware or vehicle peripheral equipment.*

## Telematic solutions from DATCOM consist of:

- Hardware components that range from onboard computers to navigation systems
- Specific software solutions, which can be tailored to your specific requirements
- An extensive service programme, which can include - in addition to consulting, technical support and training - also aspects such as installation and financing.

## Advantages for your company

- Optimized vehicle scheduling
- More success through active order management
- Always up to date about your cargo
- Reach your destinations safely - always
- Simplified payroll accounting and vehicle management
- Safety for your drivers and vehicles
- Theft protection
- Vehicle data and telemetry

## Ensuring an optimized flow of information

For you as a fleet manager, on the one hand it is important to have as much information as about the current situation your vehicles. On the other hand, you must be able to process this information in a meaningful way and to integrate the findings into your planning process. In order to help you do this even when under time pressure, DATCOM offers you specific telematic solutions that effectively support various industries and user groups.

## Industries and user groups

- Cash security
- Cab companies
- Security for construction equipment
- Service industries and sales force car fleets
- Freight forwarding businesses
- Couriers, express companies and parcel services

### Handheld / PDA / PND / Navigation

*Software for mobile data terminals and navigation systems for order processing.*

DATCOM offers high performance telematic systems for almost any kind of industry branch and field of application. Let your company benefit from our many years' experience and our detailed know-how. You can rely on comprehensive range of solutions to optimize your fleet efficiency.
